DE MAAS BV

FIREFIGHTING SOLUTIONS

RELIABLE ENGINES

FOR SPRINKLER SYSTEMS

One of De Maas's specialties is the development and manufacturing of dedicated engines for sprinkler systems. The in house capabilities give us the possibility to develop a carefully selected base engine into a high quality, high performance firefighting engine. Experience over years have given us the knowledge to do that in line with the highest demanding standards required by the market.

De Maas firefighting engines:

- Can answer worldwide and country specific demands for various specifications, including FM approval
- Are thoroughly tested and certified in our own testing facilities in The Netherlands
- Are manufactured with great accuracy and precision
- Are available in a power range of 49kW – 652kW (FM approved) and 53kW – 724Kw (non-approved)
- Have a proven record worldwide

Manufacturing with a personal touch

We translate (almost) all your wishes into a high quality firefighting engine. Not only technical requirements and demands, also wishes involving branding can be realized. Our personal touch goes beyond manufacturing, at De Maas we speak your

- ✓ Product development

- ✓ and more

HIGH POWER QUALITY ENGINEERING

The quality of the product is determined
by the level of engineering.

FIREFIGHTING SOLUTIONS FM APPROVED TESTING FACILITIES

APPROVED

De Maas is continuously investing in the quality of their products and therefore in their staff and facilities.

As a result, a modern engine test facility has been established in 2013 at the new premises in Zwijndrecht, The Netherlands. Engines can be tested according the

required standards such as FM by qualified employees. Being a FM approved supplier, we highly value every step in the production process of our firefighting engines and can therefore guarantee reliable and safe engines, both listed and non-listed.

Markets we serve:

- ✓ SHOPPING MALLS
- ✓ DATA CENTRES
- ✓ PUBLIC BUILDINGS

DE MAAS ENGINES

A LONG HISTORY IN HIGH QUALITY MANUFACTURING

Since 1922, De Maas is known as a reliable manufacturer and supplier of high quality engines to the industry.

Combining renowned base-products such as Doosan, Iveco, JCB and Lister-Petter engines with the newest techniques, qualified employees and personal attention. This in combination with the highest manufacturing standards, the Dutch company De Maas offers reliable, customized fire pump engines all over the world for many years.
